

24 PORT WALL MOUNT

Pixel offers Light Interface Units which are very easy to install and provide total solution for routing, terminating and organizing fiber Optic cable terminations.

PRODUCT DESCRIPTION

- **Pixel** provides an extensive range of fiber management systems (FMS) fully compatible with industry grade fiber adapters.
- FMS systems deliver high performance and stability & controllability.
- The WALL MOUNT patch panel has 4 cable entries (2 armored cable entries & 2 Fiber optic cable entries) and splice holder trays up to 24 Port.
- It is a powder coated box and having a front locking system with key.
- It combines cable management, slack storage, and distribution into a single space-saving and versatile unit.
- WALL MOUNT patch panels are ideal for Telco closets, backboards, and other limited space application.
- WALL MOUNT models are user selectable from 24port along with accessories like adaptor plates, ST, SC, LC, FC & Duplex /Simplex, connectors.
- WALL MOUNT patch panels are designed for easy mounting using push-fit lockable knobs and can be easily mounted in vertical direction.

PRODUCT FEATURES

- Single door hinged type design and mechanical seal.
- Better convenient wall-mount design friendly eco in any location.
- Accommodates up to 24port and applicable for indoor and outdoor installation.
- 100% tested for mechanical and optical characteristics for excellent seal performance and reusable.
- Key lock provision is restricted to access for authorized personnel only.
- Allow maximum 4 cables entry from all corners of the patch panels.
- Two-compartment construction provides for grouping and arranging cables.

PRODUCT DIMENSION

Material	Mild Steel with powder coating.
Dimensions	300*255*60 mm (W*H*D)
Color	RAL 7035/White, RAL 7032/Grey, RAL 9011/Black
Cable grommet	Rubber Material
Cable Glands	Nylon with nitride butadiene rubber, cable diameter of 5mm to 14mm max available
Fiber components standard	Telecordia GR 409
Insertion Loss	less < .5dB (Multimode), < .3dB (Single mode)
Plug/Unplug durability	1000 times

PRODUCT APPLICATIONS

24 PORT WALL MOUNT patch panels are used in

- Oil & Gas Industries.
- CCTV & Surveillance Applications.
- Rail Signaling & control Applications.
- Process Automation & Control Systems.
- Power Systems & Controls.
- PLC's Panels, Wireless BTS & Network systems.
